2) Harmonisation of the annual and period planning – 2016-09-D-52-de-1 – Mrs. Schumacher

It is proposed to introduce a component checklist, which aims to facilitate the harmonisation of the annual and period planning.

A list of different elements is an efficient tool that can be useful to improve procedures to be followed, and this could be an effective way to harmonise period planning. All the elements included in the table can be implemented by the teachers at their own pace. This periodic planning enables the school directors to have an overview of the planning and of the current situation.

The Board of Inspectors Nursery and Primary approved the implementation of the “Harmonisation of the annual and period planning” according to the following schedule:

- **Pilot phase in the first half of the year 2017/2018, with the possibility of supplementing non-considered aspects, layout suggestions for the planning scheme, evaluation in the second school semester.**
- **Introduction of harmonised period planning with the components to be considered in all European schools and all language sections in primary school level throughout the academic year of 2018/2019.**

During this pilot phase, the feedback from the teachers will be collected in order to finalise the document before its implementation.

However, the BIP insists that this document remains a non-mandatory tool.
