Introduction

About the Accredited European Schools

Accredited European Schools (AES) offer a European education that meets the pedagogical requirements laid down for the European Schools but within the framework of the national school network of the Member State in which they are located. They operate outside the legal, administrative, and financial framework to which the European Schools are compulsorily subject.

In the 2025-26 school year, there are 24 AES across 14 EU Member States. Two additional schools are currently in the process of accreditation. 18 AES have already experienced at least one Baccalaureate session.

Of the 24 Accredited European Schools:

- 17 have a nursery cycle,
- 23 have a primary cycle (although not all schools cover all the primary year groups yet),
- 24 have a secondary cycle (although not all schools cover all the secondary year groups yet),
- 19 have the European Baccalaureate cycle.

About the AES Annual Data Report

As per the [Regulations on the Accredited European Schools](#), Article 19 and Annex 10, each school commits to share a set of data by 15 October each year. The data presented in this document is, therefore, valid on 15 October 2025.

This document contains data on the situation in the Accredited European Schools in the 2025-2026 school year, with a focus on the development of the pupil population, pupils' language choices, and teaching staff numbers.

Current number of Accredited European Schools

The number of Accredited European Schools continues to grow steadily. No new schools were accredited in 2025.

Locations of the Accredited European Schools

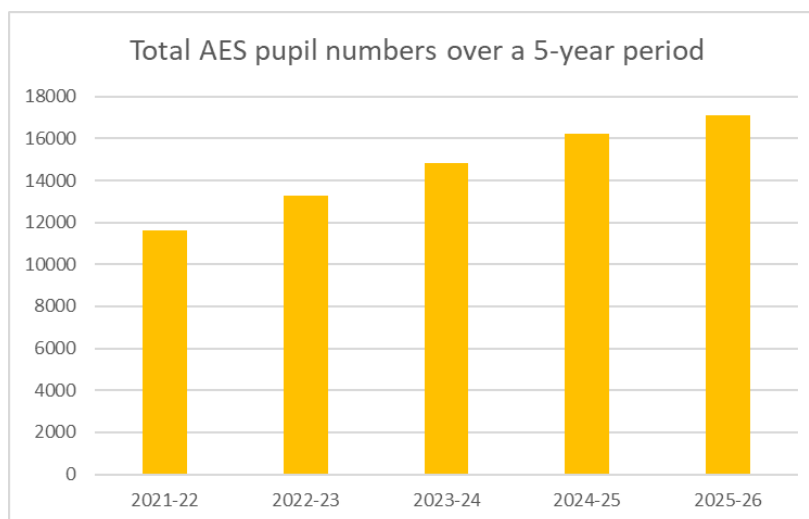

This map indicates the location of all the Accredited European Schools:

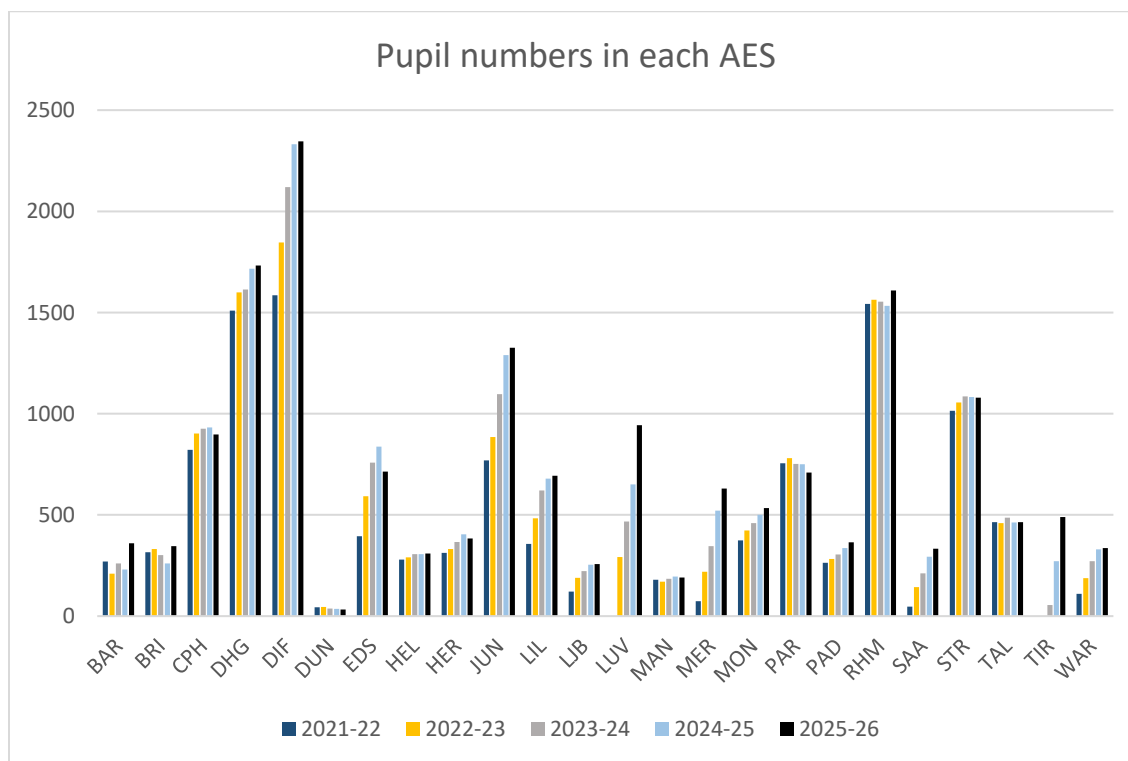

1. Pupil population

1.i Total pupil population

The total number of pupils across the various AES increases every year:

As shown in the graph above, the total number of pupils attending the Accredited European Schools has grown by 47% in the last five years. For a complete overview, the graph below shows the change in the number of pupils in each individual AES over the last five years.

1.ii Pupil population growth

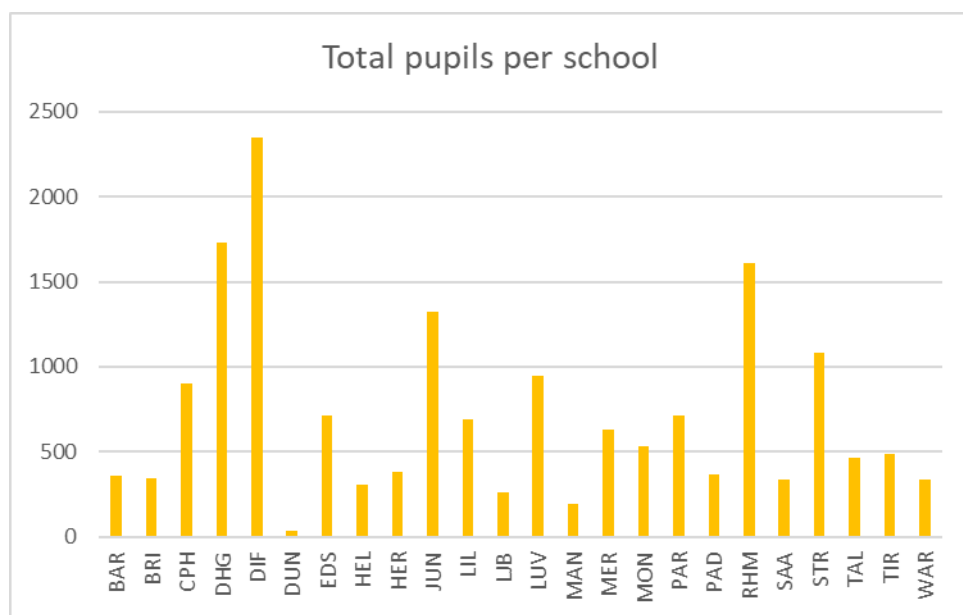

With a few exceptions, all schools have seen their pupil population grow, year on year. The schools that have seen a dramatic growth are the newer schools and the sharp increase in the number of pupils is therefore to be expected. By the same logic, the more established schools, on the whole, have seen a more limited growth in their pupil numbers, year on year.

The table below shows pupil numbers for each school (column ) and the percentage of the change (column %) from year to year, during the last five years for each AES.

2. Languages

2.i Pupil population by language section

There are a total of 12 different language sections across the 24 schools that are currently operating. The average number of language sections in the AES is 2.5 per school. The graph below shows information on the number of language sections in the AES.

The table below shows the number of pupils enrolled into the various language sections in each school for the current academic year:

Most AES have a section in the language (or at least one of the languages) of the Member State in which they are located. All Accredited European Schools have an English language section. Across all the schools, the English language section has the highest total number of pupils with 7081 pupils, followed by the French section (5060 pupils) and the German section (3029 pupils).

2.ii Choice of Language 2 (L2) among pupils

All European Schools and Accredited European Schools must offer English, French or German as the first foreign language (L2). However, some schools have asked to be exempted from this general rule in their approved Dossier of Conformity. This explains why not all three languages are represented in every school in the graph below. Schools can now also offer the host country language (HCL) as L2. The graph below shows the % of pupils studying each L2 in each school.

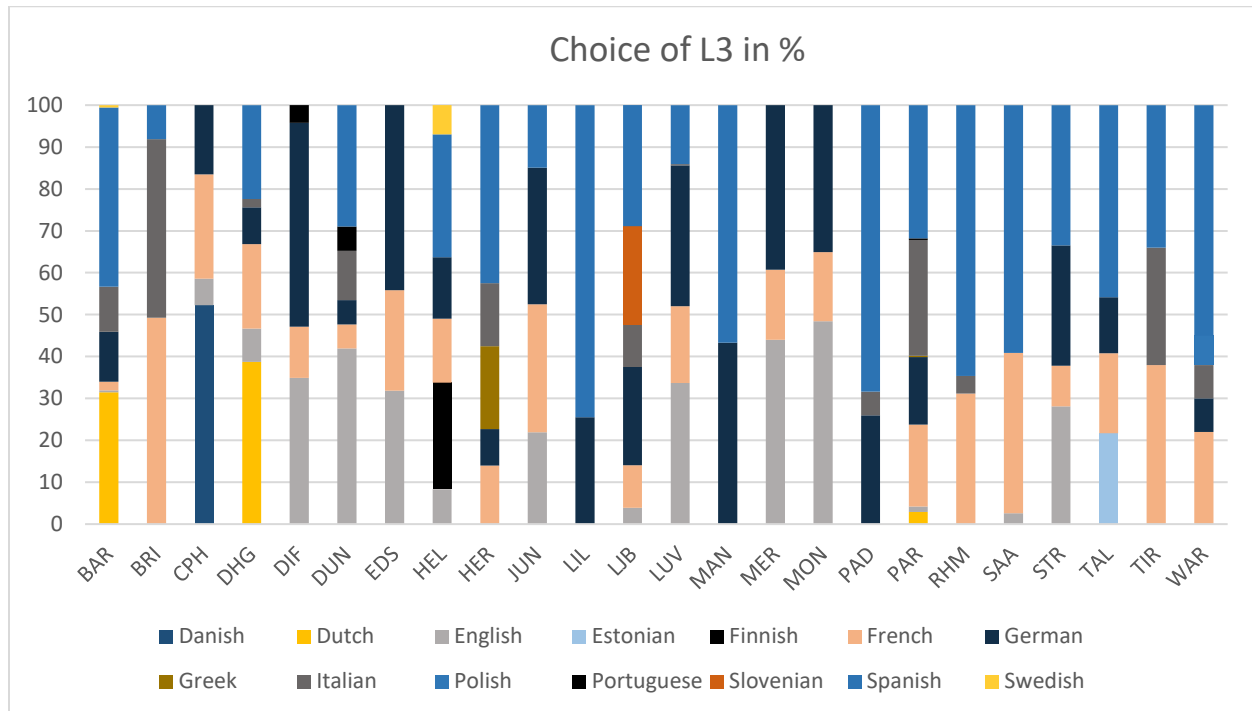

2.iii Choice of Language 3 (L3) among pupils

The following table shows the L3s being taught at each of the AES:

	Danish	Dutch	English	Estonian	Finnish	French	German	Greek	Italian	Polish	Portuguese	Slovenian	Spanish	Swedish

2.iv Choice of Language 4 (L4) among pupils

The following table shows the L4s being taught in each AES. It is important to underline that some AES do not yet provide L4 tuition because they either do not yet have the year groups involved, or because there is not sufficient demand for an L4 among the pupils.

3. Teaching staff

In total, the AES employ 2426 teachers, of which:

- 819 in the Nursery and Primary cycles (640 full-time and 179 part-time)
- 1607 in the Secondary cycle (1306 full-time and 302 part-time)
